FOR IMMEDIATE RELEASE

Quantum Medical Imaging completes Digital System installation: “QV-800 Digital Universal System” at OCMG in Encino, California

Long Island, NY – November 2004 - Quantum Medical Imaging has completed the installation of one of its DIGITAL Radiographic Systems, called “QV-800-DIGITAL” at Orthopedic Consultants Medical Group (OCMG) main office in Encino, California. The system was one of three Quantum radiographic systems, sold to OCMG, by eTrauma Corporation. The installation and support was provided by Preferred Diagnostic Equipment Service in Corona, CA.

Mark Maloney, V.P. Sales of eTrauma quoted: “The Quantum QV-800 DR system has greatly enhanced the throughput and image quality of OCMG’s radiology department. Its unique versatility allows all types of procedures to be performed with minimal effort by the technologists”. Mr. Maloney also indicated OCMG’s throughput with the Quantum QV 800 Digital system is more than twice compared to the previous non digital radiographic system.
